# GRIFFITH Q TURNER CO.'S BULBS FOR AUTUMN OF 1903 

 GENERAL DIRECTIONS TO OUR PATRONS:BULBS PLANTED
For forcing purposes late in the eason are not as satisfactory to the grower as when planted early stock.
clined to find fault with the stock.
Our early customers are always sure of the best results in selecting varieties from our own direct importation, as they get the stock at its best, and also have the advantage of early planting

ALL BULBS are mailed free at the price named in the Catalogue, except when otherwise noted.

PLANTS should be sent by express whenever possi= ble. Of course, in places where there is no Exprsss Office, Plants have to be sent by mail.

WE CANNOT, however, send Potted Strawberry Plants by mail.

REMITTANCES.-Remit by draft, postal money order or registered letter.
Orders from unknown correspondents must be ac= companied with the cash.

## Address All Orders to

205, 207 \& 209 N. Paca Street, Baltimore, Md.
GRIFFITH \& TURNER CO. gives no warranty, ex= pressed or implied, as to description, quality, produc= tiveness or any other matter of any Seeds, Bulbs or Plants they send out and they will not be in any way responsible for the crop. If the purchaser does not ac= cept the goods on these terms, they are at once to be returned.

## How to Cultivate Bulbs.

ANY good garden soil, well pulverlzed, is suitable, but good sandy of fine bone meal will be found very beneficial. Plant the large bulbs about four inches below the surface, the time for planting is in October or November, but any time during the winter will answer, if the surface only is if hard, deep frosts set in, cover with a light litter that may be raked nff in the spring. The bulbs will then shoot and flower without further trouble. If early spring should prove dry, water well. The arrangement of the bulbs in the beds is much a matter of taste and situation. They may be planted in rows, in masses, in circles, or half circles. Each color by itself, or
divided, or mixed. No matter how ar ranged, they will always prove interesting and beautiful.
After they flower and die down, the bulbs may be allowed to remain in the ground to flower the next season, or if beds are required for other plants may be taken up; soaked in laid away for replanting. Bulbs are so reasonable in price that it does not pay to keep the old ones, especially as the flowers of the new ones are far superior to the old.

## MIXED SORTS.

T$\square$ HESE are carefully selected, well-ripened bulbs, comprising different shades of the various colors they will do well in pots, but are chiefly used for outdoor culture; not to be confounded with the cheap mixtures some times offered for outdoor planting.

CULTURE of BULBS
IN POTS OR BOXES.

POTS for single bulbs should be the diameter of the bulb. The same proportion of room shouid be observed when planting in boxes or in pots holding more than one bulb. The boxes or pots should ter will lie in the bottom. The soil used should be good, sandy loam, mixed with bone meal. After planting, place Whth bone meal. After planting, place
the boxes or pets in a dark, cool place for three weeks, until the roots are well started. then gradually bring

To Grow Hyacinths in Glasses. F ILL the glass with water. Place 1 bottom touching the water. Place the glass or glasses in a dark, cool place for aoout three weeks, or until length and the flower stem one inch high. After they are brought out and acclimated, the more sunlight they get the better.
As the water evaporates it must be renewed and changed as often as it becomes discolored or impure. When water may be brought higher up on the bulb. The temperature should be as even as possible. A few drops of hartshorn in the water will help the bloom. A few drops of harts-

TTE letters $A, B$ and $C$ indicate earliness of blooming. stands for late.
We have given special attention to the selection of our Tuips, and our collection is unusually fine, embracing the choicest leading varieties. For early forcing the Duc van Thol and early spring sorts are best. They should be started in September, and treated the same as Hyacinths. Early in November they may be removed into heat. The greater part ought to be potted from the middle of September to the end of October. For outdoor planting they should be set three to four inches deep, and four to six inches apart, according to the size of the bulb. A few bulbs planted here and there produce but little effect, but when planted in masses, or in small groups, they become at once briliant and grand and surpass in variety of coloring and picturesque effect almost any other flower.

## Chinese Sacred Lily OR Joss Flower.

THIS is a variety of Polyanthus Narcissus, grown by the Thinese from time immemorial to decorate their sacred occurs in February. By methods of culture original to them, they succeed in growing large, solid bulbs, which produce a profusion of bloom wix wets from the time of growth of foliage is exceedingly the time of planting. The of a dark green color which purmomited by in wemt and large, satiny white flowers with golden sellow the whole an aspect of tropical magnificence of which the This splendia flower increases in popularity every year. and immense quantities of bulbs are into this country.

## CULTURE.

Being partially aquatic, this plant must have plenty of water. If grown in soll, make itlight and sandy, but they are usually grown in vases or dishes of water. Put an inch or two of sand and gravel in the dish in which they are to be grown, set the bulbs on this, and put enough gravel around them to keep from falling over; fill the dish in a dark closet set in a dark closet for a few daysuntil the roots start freely then bring to the light and keep in any ordinary living room. A dozen bulos started this way at intervals will give asuccession of bloom throughout the winter.

Chinese Sacred lity. which are superior to those grown elsewhere.

1FICNS.

Postage, 5c. each extra.

LILIUM HARRISII.
(Trae Bermuda Easter Lily.)
BERMUDA EASTER LILY.

## (Lilium Harrisii.)

T-HE "True Bermuda Easter Lily" is one of the grandest bulbs introduced in many years. They are easy of culture, early. flower quickly, and can be had in bloom for Christmas from bulbs manted as late as September. They are, however, mostly grown for Easter Flowers, and, of "ourse, wil produce more flowers when given a longer time. come quickly into bloom, and produce pure white, gracefully formed and delightfully fragrant flowers. The quantity of bloom produced is marvelous; the average production of bulbs 5 to 7 inches in circumference, even when forced, is from 5 to 8 flowers, and of bulbs 7 to 9 inches. 8 to 12 flowers.

BLOOMING PLANTS IN POTS form typical Easter offerings and presents for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highty itppreciated. Thousands upon thousands are sold in the large cities every winter for this purpose.

LILIES
CULTURE IN POTS. HEN grown in pots, the best soil is sandy flower finely in a light. rich mixture. It is advisable to begin with the smallest size pot in which the bulbs can be placed, and to shift into larger and larger pots as the plant progresses, and until the flower buds apbear, when, of course, no further shifting should be
done. A cool temperature suits the best, and the plants should be liberally watered during the period
of growth and flowering.

CALLA LILIES.
(Richardia Aethiopica.) HE White Calla, or Lily of the Nile, is a easy culture, and in winter is one of our best window plants. To aid profuse blooming, keep them

White Calla. dormant from the middle of June to the last of August, repot in good dance, and the result will be most sat; give water, light and heat in aomdance, and the result will be most satisfactory

## LILY OF THE VALLEY.

One of the most charming of spring flowering plants, bearing slender stems set with tiny bells which diffuse a delicious odor. They are largely used for forcing in winter, and can be flowered in the house. To secure

## LILIUM LONGIFLORUM. <br> (Ready in October.)

TIIS well-known beautiful variety is also widely used for forcing for the Easter holidays. Its flowers have mori Lily. It is quite hardy and beautiful in the open ground blooming in June and July. Flowers snow white, trumpe-

By mail, 10

## LILIUM AURATUM.

Of all the Lily tribe, this is undoubtedly one of the finest, whether we regard its size, its sweetness, or its exquisite arrangement of color. Its large and graceful flowers are com-
posed of six petals, of a delicate ivory-white color, thickly posed of six petals, of a delicate ivory-white color, thickiy studded with chocolate crimson spots, and striped through produced on a stem, and as the bulbs acquire age and strength the flowers increase in size and number. It is perfectly hardy, and thrives best in a moderately dry, rich loam where the water does not lie in winter. Good drainage is necessary to the successful growing of this Ifily Plant six inrhes deep, and cover lightly during winter.

HIICM ALRATLM.-Second size, 7 to 9 inches in circumference. $\mathbf{1 0} \mathrm{c}$. earh; \$1.00 per dozen; mailed free. LILIUM SPECIOSUM. (Lancifolium.)

The varieties of "Lilium Sueciocurn comprise the most importánt of easy growth, and can always be relied upon to give satisfaction to the buyer. The flowers are very beautiful. showy and distinct, and exquisitely fragrant. Magnificent as Lorder plants; they are excellent for pot culture.

SPHCIOSLM ALBCM. - L arge White flowers, of great substance, With a greenish band running through the centre of each petal:
very fine. 13c. each; \$1.25 per dozen; by mail, \$1.44.

- HECIOSLM RIBRLM, - White, heavily spotted with rich crimson spots. 15c. each; \$1.25 per dozen; Ly mail, \$1.40.

## LILIUM CANDIDUM.

## The Bridal Lily of Bermuda.

The old-fashioned pure white Garden Lily. As it starts into growth very early in the fall, it should be ordered Farly, and for this reason it is best planted in August and September. It is also considerably used in some loralities for foreing. It grows about four feet high, bearing large clusters of snowy white, me-dium-sized flowers.

## Selected Bulbs, Extra Fine:

## Iris Kaempferi.

JAPANESE IRIS.

These magnificent Japanese Iris are among the most beau. iful of our summer flowering plants, and are destined to become great favorites. They commence flowering early in July, and continue in bloom for five or six weeks, if plentifully supplied with water while growing and flowering. ${ }^{1}$
Many of these flowers measure from ten to twelve inches in diameter and almost rival the Orchids in their rich colorings and markings.

## PREPARATION AND CARE OF =LAWNS.

THE ground should be thoroughly drained and well enriched before sowing. Work the soil until well pulverized, and have the surface as level as possible, so that the grass may present an even appearance. After sowing, cover seed lightly and follow with roller. The best results are obtained by using plenty of seed, four bushels to the acre being about the right quantity. One quart is sufficient for 300 square feet. Let the grass obtain a good start before cutting, and then it should be trimmed with a lawn mower about every ten days. Old lawns may be improved and renewed by the application of fertilizers and seeding about half the quantity of seed required for new lawns. This should be done whenever they show any thin places.

Our LAWN GRASS should not be confounded with the cheap, chafiy grasses offered at less prices. PARK LAWN GRASS.

This mixture does not contain so much of the high-priced grasses as our Evergreen Lawn Grass, but it is superior to many of the cheap grades offered, and will make a very nice lawn.
Bushel of 16 pounds4.00

## GRIFEITH Q TURNER CO.'S EVERGREEN LAWN GRASS.

This is a first-class mixture prepared by ourselves, and containing nothing but choice seeds; just the thing for tennis, croquet and ball grounds, remaining green and fresh during the hot summer months. Widely known and extensively used on the finest private and public grounds around Baltimore, Washington and elsewhere with the most satisfactory results, Nothing adds to the attractiveness of suburban homes more Nothing adds to the attractiveness of suburban homes more than a well-kept, closely cut, velvety lawn; hence the impor-
tance of securing the best seeds. This we offer in our selecttance of securing the best seeds. This we offer in our select-
ed Evergreen Lawn Mixture. containing different varieties that grow and flourish at diferent months of the vear, so that a rich, green, velvety lawn is constantly maintained. It is adapted to the small grass plots of city homes.

WHITE DUTCH CLOVER ('Trifolitum Repers.)

The best variety for lawns, as forms a close herbage and remains green throughout the season. It is also valuable when mixed with grass seeds for pasture. Sow in spring at the rate of six pounds per acre when sown alone, half the quantity when sown with other grasses.

Pound, 30 c . 10 pounds, \$2.75.

The two above-named varieties, 60c. each. Three for $\$ 1.50$. Six for $\$ 2.75$. \$4.50 per dozen.

Additional French and American Varieties, including Shropshire Damson.

35̄. each, \$3.50 per dozen.

## JAPAN HARDY ORANGE.

## (Citrus Trifoliata.)

ANEW Hardy Orange. Has of late created quite a sensation North from the fact that it is perfectly hardy; it blooms and fruits profusely in the parks of Philadelphia and New York. To have a fruiting Orange tree in your garden is certainly something to be proud of; its large, white, sweet-scented flowers are produced in the greatest abundance before the fruit appears. Well adapted for hedges, making a close, compact growth that nothing can penetrate. Such a hedge when in bloom and fruit is certainly one of the greatest sights to be seen. Fruit small, bright orange red in color, has a peculiar flavor; fine for preserving.
Price-Three fears, by freight or express, 50c. each, $\$ 3.50$ yer dozen, $\$ 15.00$ per 100.
Price-Hardy Orange for Hedges on application. Plant 6 to 8 inches apart.

## CHERRIES.
